INDEX.

Alligators of Guiana, Dr Hancock's account of the, 303
Anatomists, hints to, 195
Animal kingdom, remarks on its continuity by generation, 152
Animals, domestic, researches into their history, 309
——— experiments on insufflation of, 371
Astronomy, notices in, 193
Aurora borealis, its effects on the magnetic needle, 360

Barclay, Alexander, Esq. his account of the land-crabs of Jamaica, 280
Beaumont, M. E. de, his remarks on the relative age of mountains, 299
Beaver, notice respecting the, 90
Beavers, colony of, discovered in Prussia, 369
Becquerel, M., his remarks on the influence of electricity on the form of inorganic bodies, 354
Bicephalous child, account of one, 197
Blowpipe, colours communicated to the flame of the, 341
Bones of palæotheria discovered in calcaire grossier, 367
——— of different classes of animals, analysis of, 375
Bosc, M. Cuvier's biographical account of, 274
Botany, notices in, 199, 375
Bovista gigantea, notice respecting a specimen of, 377
Bromine in salt springs, 366
Buzengeiger, M., his remarks on colours communicated by the flame of the blowpipe, 341

Calcareous crystals in vegetables, 199
Caprification, notice respecting, 378
Caspian sea, level of the, 194
Castor and Pollux lights accompanying a storm, 361
Cat, supposed origin of, 369; inquiries respecting the, 309
Caves containing organic remains, 159, 368
Cavities containing fluid in rock salt, 111
Caymans of Guiana, Dr Hancock's account of the, 303
Celestial phenomena from July 1. to October 1. 1829, 189; from October 1. 1829 to January 1. 1830, 351
Chamæleon, Mr Houston's observations on the tongue of the, 161
Chemistry, notices in, 363
Child with two heads, 197
Christie, Dr A. T., his account of the Southern Mahratta country, 49
Climate of Sennar, 96; of New South Wales, 93
Clinkstone, C. G. Gmelin's account of, 68
Coalwork, account of the inundation of one, 237
Collections of rocks and minerals in Great Britain, 113
Collier, Mr Charles, his observations on univalves, 225
Coldness of the late spring, 360
Conybear, W. D., Esq., his answer to Dr Fleming's view of the evidence as to the former temperature of the northern regions, 142
Comet of Encke, observations on the, 193
Continuity of the animal kingdom by generation, 152

XUM

Crabs of Jamaica, Mr Barclay's account of the, 280
Cruickshank, Prof., his account of an extraordinary case of atmospheric refraction, 254
Crystallization, remarks on, 365
Cuvier, Baron, his account of the state of Natural History, 1 ; biography of M. Pinel, 205 ; of M. Bosc, 274
Cypræa, formation of the shell of, 374

Dahlia, notice respecting the, 378
Darwinia, Brunsfelsia, &c., Mr Don's remarks on, 83
Dekay, Mr, notice by him respecting Squalus maximus, 372
Dog, supposed origin of the, 369
Domestic animals, researches into the natural history of the, 309
——— transported from the Old to the New Continent, 326
Don, Mr David, his observations on Darwinia, &c. 83
Doornik, Dr, his remarks on organic remains, 72
Dry pile, influence of meteorological phenomena on the, 357

Earthquakes on the Mississippi, Mr Flint's account of, 262
Electricity, its influence on the form of certain inorganic bodies, 354
Electricity, metallic, notice respecting, 356
Elements of vegetable pathology, notice respecting, 384
Encyclopædia of plants, Loudon's, notice of, 386
Ergot in maize, M. Roulin's remarks on the, 207

Fleming, Dr, Mr Conybeare's answer to his view of the evidence as to the former temperature of the northern regions, 142
Flint, Mr, his account of earthquakes on the Mississippi, 262
Flora of Berwick-upon-Tweed, notice respecting it, 200
Flourens, M. his account of hibernation, 219
——— on the action of the spinal marrow in respiration, 338
Fossil organic remains in the Caves of Bize, 159
——— Dr Doornik's remarks on, 72
——— Werner's views of, 72
Forbes, J. D. Esq. his account of a greenstone boulder, 259
Forest, submarine, Rev. Mr Smith's account of one in Tireé, 125
Fungi, method of preserving, 375

Galena from Castleland Hill, Mr Robertson's analysis of, 257
Geographical society of Berlin, 383
Geology of the Meywar district, Mr Hardie's account of the, 116
Geological collections in Great Britain, 113
Germination, notice respecting experiments on, 376
Giraffe, remarks on the, 196
Gmelin, C. G. his account of clinkstone, 68
Graham, Dr, his account of new or rare plants in Edinburgh Botanic Garden, 178, 344
Greenstone boulder, Mr Forbes's description of one, 259

Hancock, Dr John, his account of the alligators of Guiana, 303
——— of a red pigment, 283
Hardie, James, Esq. his account of the geology of the Meywar district, 116

Herring and Mackerel, Major Morrison's observations on the migration of the, 317
Hibernation, and the action of cold on animals, 219
Houston, John, Esq. his account of the tongue of the chameleon, 161
Human remains discovered in caves in France, 368
Hydrography, notices in, 194

Indigence, its influence on mortality, 378
Innes, Mr George, celestial phenomena calculated by, 189, 351.
Influence of climate, &c. notice of Dr Clark's work so called, 202
Insufflation of animals, experiments on the, 371
Inundation of a coal-work at Beaujonc, 237
Iodine in salt springs, 366

Journal of a Naturalist, notice respecting it, 384
Jungfrau, account of an ascent to the summit of the, 141

Land-crabs of Jamaica, 280
Limestone deposite containing animal matter, 366
Lyell, Charles, Esq. his remarks on the excavation of valleys, 15
——— account of the tertiary fresh-water formation of Aix, 287.

Mackerel, Major Morrison's observations on the migration of, 317
Mahratta country, Dr Christie's account of the, 49.
Magnetic needle, influence of the aurora borealis on the, 193.
Malaria, M. Villermé's remarks on its influence on human life, 193.
Metallic electricity, notice respecting, 356
Meteorological phenomena, their influence on dry piles, 357
Meteorology, notices in, 193, 360
Meywar district, Mr Hardie's account of the geology of the, 116
Mineralogical collections in Great Britain, 113
Mollusca, terrestrial, capable of being transported alive, 374
Molluscous animals, mode of killing, 373
Mohs, Sir Frederick, account of, 251
Mole, remarks on the vision of the, 340
Monsters, human, 196, 197
Mortality, influence of indigence upon, 378
Mountains, relative age of, 299
Murchison, R. J. Esq. his remarks on the excavation of valleys, 15
——— account of the fresh-water tertiary formation of Aix, 287
Natural history, Baron Cuvier's account of the present state of, 1
Nicol, W. Esq. his description of cavities in rock-salt, 111

Patagonians, height of the, 195
Patents granted in England, 203, 390; in Scotland, 204, 392
Pasturages, remarks on their extent, 272
Palæotheria, bones of, discovered near Paris, 367
Pigeon without brain, 372
Pinel. M. Philippe, Baron Cuvier's account of, 205
Plantæ Asiaticæ rariores, notice respecting, 200
Plants flowering in Edinburgh Botanic Garden, 178, 344
Polish for wood, 323
Prickle in the lion's tail, 371
Publications, new, notice respecting, 200, 384

XUM

Rain, extraordinary, at Bombay, 194
Red pigment called Carucru, Dr Hancock's account of the, 283
Refraction, atmospheric, extraordinary case of, 254
Rice-paper, made of the pith of a plant, 375
Robertson, Mr W., his analysis of a spring near Inverkeithing, 99—analysis of galena from Castleland, 257
Roulin, M., his account of the ergot in maize, 217——of changes produced in domestic animals, 326

Savart, M., his inquiries respecting the structure of bodies which crystallize regularly, 365
Serres, M. Marcel de, his account of the circumstances which accompanied the deposition of the tertiary formation, 264
Shell, formation of that of Cypræa, 374
Shells, univalve, observations respecting,
Siberia, M. Kupfer's journey to, 194
Sloane, Mr J. F., his remarks on thirst in snow-clad countries, 65
Smith, Reverend C., his account of a submarine forest in Tiree, 125
Sow, impression made by the foot of the, 285
Spinal marrow, M. Flourens on its action in respiration, 338
Spittal, Mr R., his account of the footmarks of the sow, 285——notice respecting a large bovista, 377
Sprat, notice respecting the, 372
Spring near Inverkeithing, analysis of the water of a, 99
Squalus maximus, account of, 372
St Hilaire, M. G., on the vision of the mole, 340——on the continuity by generation of animals,
Stevenson, Mr R. junior, his account of the footmarks of the sow, 285
Storm in Mediterranean, with Castor and Pollux lights, 361
Sulphuric acid, native, 364

Talc and mica, notice respecting, 364
Tape-worms found in water, 374
Tapir, account of a new species of, 155
Thirst in snow-covered countries, 65
Tertiary formations, M. de Serres on the circumstances which have accompanied the deposition of the, 264
Thorine, a new earth, 363

Unicorn, remarks on the, 196
Univalve shells, Mr Collier's observations on, 225

Valleys, Messrs Lyell and Murchison on the excavation of, 15

Websterite in the plastic clay of Auteuil, 363
Werner's views on organic remains, 72
Wernerian Society, proceedings of, 192
Werner's advice to the students of geology, 72
Wood, account of the German polish for, 323

Zoology, notices in, 195, 369

P. NEILL, PRINTER.

CONTENTS.

Page

ART. I. On the State of Natural History, and the progress which it has made since the return of the Maritime Peace. By Baron CUVIER, - - - 1

II. On the Excavation of Valleys, as illustrated by the Volcanic Rocks of Central France. By CHARLES LYELL, Esq. F.R.S. Vice-President of the Geological Society of London, &c. and RODERICK IMPEY MURCHISON, Esq. F.R.S. Secretary to the Geological Society of London, &c. With Three Plates. (Communicated by the Authors), - - 15

III. Sketches of the Meteorology, Geology, Agriculture, Botany, and Zoology of the Southern Mahratta Country. By ALEXANDER TURNBULL CHRISTIE, M.D. Member of the Wernerian Society. (Continued from p. 120. of preceding Volume), - 49

IV. On Thirst in Snow-covered Countries. By Mr J. F. SLOANE. Communicated by the Author, - 65

V. On Clinkstone or Phonolite. By C. G. GMELIN, 68

VI. 1. Observations concerning Fossil Organic Remains. By J. C. DOORNIK, M.D. &c. 2. Werner's Views of the Natural History of Fossil Organic Remains. 3. Werner's Advice to Students of Geology, 72

VII. Observations on the Characters and Affinities of Darwinia, Brunsfelsia, Browallia, Argylia, Eccremocarpus, and of a Plant improperly referred to the latter genus. By Mr DAVID DON, Librarian of the Linnean Society, Member of the Imperial Academy Naturæ Curiosorum, of the Royal Botanical Society of Ratisbon, and of the Wernerian Society of Edinburgh, &c. Communicated by the Author, - 83

VIII. A Notice of the Beaver, from Observations made on Two Living Specimens at present in this Country, 90

505.2

56860

XUM

ART. IX. 1. Climate of New South Wales. 2. Climate of Sennar, - - - - 93–96

X. Analysis of the Water of a Spring on the Estate of Fordel near Inverkeithing, 1829. By the Rev. W. ROBERTSON *junior*, of Inverkeithing. Communicated by the Author, - - 99

XI. On the Cavities containing Fluids in Rock-Salt. By WILLIAM NICOL, Esq. Lecturer on Natural Philosophy. Communicated by the Author, 111

XII. List of Geological and Mineralogical Collections in Great Britain and Ireland, - - 113

XIII. Observations on the Geology of the Meywar District. By JAMES HARDIE, Esq. Member of the Medical and Physical Society of Calcutta. Concluded from p. 335. of preceding Volume, 116

XIV. On a Submarine Forest on the Coast of Tiree, one of the Western Isles. By the Rev. COLIN SMITH of Inverary. Communicated by the Author, 125

XV. Ascent to the Summit of the Jungfrau, in the Canton of Berne, - - - - 141

XVI. Answer to Dr FLEMING's View of the Evidence from the Animal Kingdom, as to the former Temperature of the Northern Regions. By W. D. CONYBEARE, Esq. F.R.S. M.G.S. &c. Communicated by the Author, - - - 142

XVII. Of the Continuity of the Animal Kingdom by means of Generation, from the first Ages of the World to the present times, - - - 152

XVIII. On a new species of Tapir, discovered in the Andes, with Remarks on Antediluvian Animals, 155

XIX. Fossil Antediluvian Animals mingled with Human remains in the Caves of Bize, - - 159

XX. On the Structure and Mechanism of the Tongue of the Chæmeleon. By JOHN HOUSTON, Esq. Member of the Royal College of Surgeons in Ireland, Conservator of the Museum, and Demonstrator of Anatomy in the School of Surgery, &c. With a Plate, - - - - - 161

XXI. Description of several New or Rare Plants which have flowered in the neighbourhood of Edinburgh, and chiefly in the Royal Botanic Garden, during the last three months, - - 178

ART. XXII. Celestial Phenomena from July 1. to October 1. 1829, calculated for the Meridian of Edinburgh, Mean Time. By Mr GEORGE INNES, Aberdeen, - - - - - - 189

XXIII. Proceedings of the Wernerian Natural History Society. (Continued from former Volume, p. 391.), - - - - - 192

XXIV. SCIENTIFIC INTELLIGENCE.

ASTRONOMY.

1. Observations on the Comet of Encke, - - 193

METEOROLOGY.

2. Malaria. 3. Influence of the Aurora Borealis on the Magnetic Needle. 4. Rain at Bombay, - - 193–4

GEOGRAPHY.

5. Mr Professor Kupfer's Journey into Siberia, - 194

HYDROGRAPHY.

6. Level of the Caspian, - - - - - ib.

ZOOLOGY.

7. Height of the Patagonians. 8. Hint to Dissectors of Human Bodies. 9. The Giraffe and Unicorn. 10. Female Child with Two Heads. 11. Observations on a Human Monster belonging to a new genus, - 195–197

BOTANY.

12. On the Calcareous Crystals which occur in the Tissues of living Vegetables, - - - - - 199

NEW PUBLICATIONS.

I. Flora of Berwick-upon-Tweed. By GEORGE JOHNSTON, M. D. Fellow of the Royal College of Surgeons, &c. Vol. I. Phænogamous Plants, - - - 200

II. Plantæ Asiaticæ Rariores; or, Descriptions and Figures of a Select Number of Unpublished East Indian Plants. By N. WALLICH, M. D. &c. - - - ib.

III. The Influence of Climate in the Prevention and Cure of Chronic Diseases, &c. By JAMES CLARK, M. D. Fellow of the Royal College of Physicians of London. 1 Vol. 8vo, - - - - - - - 202

ART. XXV. List of Patents granted in England from 23d January to 28th March 1829, - - 203
XXVI. List of Patents granted in Scotland from 10th March to 5th June 1829, - - 204

CONTENTS.

Page

ART. I. Biographical Memoir of M. PHILIPPE PINEL. By Baron CUVIER, - - - - 20

II. On the Ergot in Maize, and its Effects on Man and Animals. By M. ROULIN, - - 21

III. On Hibernation, and the Action of Cold upon Animals, - - - - 21

IV. General Observations on Univalves. By CHARLES COLLIER, Esq. Staff-Surgeon at Ceylon. Communicated by Sir JAMES MACGRIGOR, Director-General of the Army Medical Board, F. R. S., &c. &c. 22

V. An Account of the Inundation of a Coal-work at Beaujonc, near Leige, belonging to Messrs Colson and Company, and of the remarkable escape of a number of the Miners, - - - 237

VI. Sir FREDERICK MOHS, Professor of Mineralogy in Vienna, - - - - 250

VII. Extraordinary Case of Atmospheric Refraction. By JOHN CRUICKSHANK, Esq. Professor of Mathematics in the Marischal College, Aberdeen. (Communicated by the Author), - - - 254

VIII. Analysis of Galena, from Castleland Hill, near Inverkeithing. By Mr A. ROBERTSON *junior*, Inverkeithing. (Communicated by the Author), - 256

IX. Notice of a large Greenstone Boulder in the Pentland Hills. By JAMES D. FORBES, Esq. (Communicated by the Author), - - - 259

X. Notice of Earthquakes on the Mississippi. By Mr FLINT, - - - - 262

XI. On the Circumstances which appear to have accompanied the Deposition of the Tertiary Formations. In a Letter addressed to M. ADOLPHE BRONGNIART, by M. MARCEL DE SERRES, - - 264

XII. On Pasturages, their importance and their extent, in the different Countries of Europe, - 278

XUM

Art. XIII. Biography of M. Bosc. By Baron Cuvier, - 274
XIV. On the Land Crabs of Jamaica. By Alexander Barclay, Esq. - - - 280
XV. On the Red Pigment called Carucru or Chica. By John Hancock, M. D. (Communicated by the Author), - - - - 283
XVI. Report on the Impression made on the Ground by the Foot of the Sow. (Communicated by Messrs Robert Spittal and Robert Stevenson junior), 285
XVII. On the Tertiary Fresh-water Formations of Aix, in Provence, including the Coal-field of Fuveau. By Roderick Impey Murchison, Esq. and Charles Lyell, Esq. junior, Secretaries to the Geological Society; with a Description of Fossil Insects, Shells and Plants, contained therein, by John Curtis, F. L. S., J. De C. Sowerby, F. L. S., and J. Lindley, Esq. Professor of Botany in the London University. (Communicated by the Authors), - - - - 287
XVIII. Inquiries respecting the Relative Age of Mountains, - - - - 299
XIX. Observations on the Caymans or Alligators of Guiana. By John Hancock, M. D. (Communicated by the Author), - . - 303
XX. Researches in regard to the Ancient History of our Domestic Animals, and our Common Plants. By M. Dureau de la Malle, - - 309
XXI. Observations connected with the Migration of the Herring and Mackerel, as noticed in the British Channel. By Major W. D. Morrison. (Communicated by the Author), - - 317
XXII. On the Naturalization of the Cashmeer Shawl-Goat in England. By C. T. Tower, Esq. of Weald Hall, Essex, - - - 321
XXIII. On the German Polish for Wood, - - 323
XXIV. Inquiries respecting certain Changes observed to have taken place in Domestic Animals, transported from the Old to the New Continent. By M. Roulin, M. D., - - - 326
XXV. On the Action of the Spinal Marrow in Respiration. By M. Flourens, - - 338
XXVI. On the Vision of the Mole. By M. Geoffroy Saint Hilaire, - - 340

Page

ART. XXVII. Colours which different Substances communicate to the Flame of the Blowpipe. By M. BUZENGEIGER, - - - - 341

XXVIII. Description of several New or Rare Plants which have flowered in the neighbourhood of Edinburgh, and chiefly in the Royal Botanic Garden, during the last three months, - 344

XXIX. Celestial Phenomena from October 1. 1829 to January 1. 1830, calculated for the Meridian of Edinburgh, Mean Time. By Mr GEORGE INNES, Aberdeen, - - - 351

XXX. SCIENTIFIC INTELLIGENCE.

NATURAL PHILOSOPHY.

1. Influence of Electricity in the Formation of certain Inorganic Bodies. 2. Metallic Electricity. 3. Influence of Meteorological Phenomena on Dry Piles, - - 354-9

METEOROLOGY.

4. Remarkable Coldness of the late Spring. 5. Changes of Climate at Sheraz. 6. Effects of the Aurora Borealis on the Magnetic Needle. 7. A Storm in the Mediterranean, accompanied with Castor and Pollux Lights, - 360-2

CHEMISTRY.

8. Thorine, a new Earth, - - - 363

MINERALOGY.

9. Notice respecting the presence of Websterite in the Plastic Clay of Auteuil, near Paris; by M. BRONGNIART. 10. Talc and Mica. 11. Native Sulphuric Acid. 12. Discovery of Iodine in an Ore of Zinc. 13. Inquiries into the Structure of Bodies which Crystallize regularly. 14. Glassy Felspar, now called Ryakolite, - - 363-6

GEOLOGY.

15. Discovery of Iodine and Bromine in certain Salt-springs and Mineral-waters in England. 16. Examination of a Limestone Deposite, by M. VAUQUELIN. 17. Bones of Palæotheria discovered in a bed of the coarse Limestone Formation, near Paris. 18. Caves containing Human Bones, - - - - 366-8

Page

ZOOLOGY.

19. European Beaver. 20. Original of the Cat and Dog. 21. On the Prickle which exists in the Tail of the Lion. 22. Insufflation of Animals. 23. Pigeon continued to live two days without Brain and upper part of Spinal Marrow. 24. The Sprat not the young of the Herring and Pilchard. 25. White Bait not the young of the Shad. 26. On Squalus maximus. 27. On Killing Molluscous Animals. 28. Terrestrial Shell Animals may be carried alive great distances. 29. Formation of the Shell of the Cypræa. 30. On the Tape-worms found in Water. 31. Comparative Analysis of the Bones of the different Classes of Animals, - - - 369-375

BOTANY.

32. Rice Paper. 33. Method of Preserving Funguses. 34. Germination. 35. Notice by Mr R. SPITTAL of a specimen of Bovista gigantea, remarkable for its great size. 36. The Dahlia. 37. Caprification, - 375-8

STATISTICS.

38. Influence of Indigence on the Mortality of Men in the different Countries of Europe from the commencement of the Nineteenth Century. 39. On the Distribution by Months of Conceptions and Births, in its relations to Seasons, Climates, &c. 40. Berlin Geographical Society, - - - - 378-383

NEW PUBLICATIONS.

I. Elements of Veterinary Pathology, and Theoretical and Practical View of the Medical and Surgical Treatment of the principal Domestic Animals, - - 384

II. The Journal of a Naturalist. Second Edition, 8vo. 1819, ib.

III. An Encyclopædia of Plants; comprising the Description, Specific Character, Culture, History, Application to the Arts, &c. &c. Edited by J. C. LOUDON, F. L. S. H. S. &c. 386

ART. XXXI. List of Patents granted in England from 30th March to 19th June 1829, - - 390

XXXII. List of Patents granted in Scotland from 1st July to 7th September 1829, - 392
